

CB 260 Brake pads for overrun brake - 6 Stück

Accessories for CB 260 Cable Box

Item no.: 21125

STRONGEST CABLE PULLING TOOLS
**DATA**

ITEM NO.	21125
DIMENSION	L 28 mm x B 22 mm x H 5 mm
WEIGHT NET KG	0,007 kg
MATERIAL	Special plastic
EAN-CODE	9120045478617

ADVANTAGES

- Spare part for the CB 260 overrun brake
- Quick to replace – no need to dismantle the overrun brake
- Prevents uncontrolled unwinding of cables or individual wires
- Reduces the unwinding speed
- Safe during transport

DESCRIPTION

The brake pad of the CB 260 overrun brake is a specially developed wear part that is responsible for the controlled braking of the cable reel. Due to constant friction during use, this element wears out over time and must be replaced when wear is noticeable.

Replacement can be carried out without dismantling the overrun brake: use a narrow flat-head screwdriver to gently lift the insert, move it in the direction of the arrow and replace it. This restores the optimum braking effect of the CB 260 Cable Box.

The robust special plastic is designed for heavy-duty use and ensures that the unwinding speed is reduced and the reel is fixed in place during transport.

Scope of supply: 6 x Brake pads CB 260
